# Visiplex Care Link™

## Wireless Patient/Nurse Communication System: The difference between getting beeped and communicating.

Visiplex Care Link allows healthcare professionals to provide better care with increased efficiency and speed.

Easy to use and operate, Care Link is a wireless pendant paging system that can stand alone or interface with most nurse call systems alerting the staff with an alphanumeric text message.

Messages are automatically transmitted to assigned personnel, enabling them to respond quickly and effectively to patient needs.

Care givers have a choice of being alerted by either an audible beep tone or a silent vibrate.

Here's a proven way any nursing staff can dramatically increase the level of care patients receive. Care Link truly links patients to nurses.
